

## **WIEGAND<sup>®</sup> FlexLine Trolley System**

Trolleys for all your needs – developed for use in hospitals, clinics, doctor's surgery, care and nursing homes.

## Basic configuration

Configure the ideal nursing trolley for your work processes

From TopModul to swivel castors, you can configure your WIEGAND® FlexLine nursing trolley according to your needs. The FlexLine trolley system is available in six different trolley heights and various trolley widths. All trolley components can be adapted to best suit your work processes and the needs of health care professionals. With a FlexLine nursing trolley, you will no longer have to make compromises and you will be investing in a sustainable solution.

TopModules are available in ABS, Inox or solid synthetic resin panels (VKH)

Practical steering handle for all trolley types, also available without on request

Drawers are available in various heights

Shelving profile allow to arrange the trolley flexible

Full-extension frame and shelving profile can be combined

Available with doors, drawers, shutters or also open

Wheels available in various versions

## Innovative nursing trolley – robust, durable and functional

Your expert for medication and logistics solutions

For over 45 years, Wiegand has been developing impressive solutions for consumable supplies and medication logistics. We have extensive discussions with nursing staff and therefore are familiar with the common procedures – which may vary depending on the institution or department. Our trolley system is therefore not limited to standard products. On the contrary, you can choose from a wide range of accessories, compatible add-ons and drawer units.

Invest in a FlexLine nursing trolley and benefit in the long term from the high quality and high adaptability of the FlexLine trolley system. Our nursing trolleys can be converted or reconfigured at any time and can thus continue to be used in the event of changing needs without high investments.

### Swiss Made

The FlexLine nursing trolleys are manufactured in our own production facility in Bülach. As an independent manufacturer, we are able to produce customised nursing trolleys starting at just one unit. Each FlexLine nursing trolley is precisely handcrafted for you using high-quality, durable materials. Wiegand is a family business that is and will remain firmly established at our production facility in Switzerland.

### 5-year guarantee on WIEGAND® FlexLine nursing trolleys

The WIEGAND® FlexLine nursing trolleys are entirely maintenance-free, so that you will not incur hidden costs in the future. We grant a 5-year warranty from the date of delivery on WIEGAND® FlexLine trolley systems that are manufactured in Switzerland. We extend a 24-month warranty on accessory parts and trolley components from the date of delivery.

## Configuring nursing trolleys

To support the work processes of health care professionals, an easy access to material is crucial. Choose whether you work with drawers, doors, shutters or with an open trolley. The FlexLine trolley system offers you various options to choose from.

The exterior of the FlexLine nursing trolleys are made of high-quality, full synthetic resin panels. The material is extremely robust, durable and easy to clean.

### Drawers

The width of the drawer is determined by the trolley type. The sheet metal body of the drawer is available in heights of 5, 10 and 20 cm and can be combined with front panels from 6 cm high upwards.

We offer you various ways of organising the drawers. Whether you want to work with small containers, TRESTON containers or subdivisions – you will find practical partition sets for drawers in our range. There is more information on this from page 34.

### Doors

The doors of the FlexLine nursing trolleys are made of full synthetic resin sheets and can be fitted with various locking systems. Single or double doors can be fitted to the trolley. It is also possible to fit the trolley with doors at the front and rear so that material can be accessed from both sides. The doors are fitted with rounded, coated steel handles that can be easily disinfected.

### Combination of doors and drawers

The FlexLine trolley system enables you to combine doors with drawers. The nursing trolley can thus be ideally adapted to the needs and work processes on your ward. Drawers can also be fitted behind doors, offering even more flexibility in organising your materials. The drawers have a self-closing mechanism that prevents unintentional opening while moving.

### Shutter

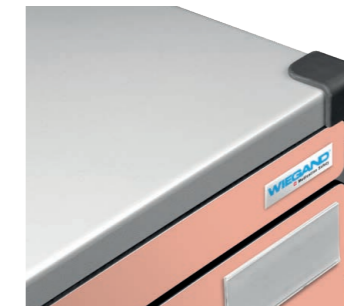

Our trolleys are also available with practical shutters. The shutters are maintenance-free and can be fitted with various locking systems. The shutters are equipped with the innovative 'push to open' function. This makes it possible to fully open the trolley within a few seconds.

## TopModules of your choice

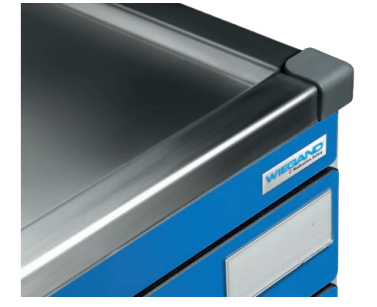

The work surface of the nursing trolley is used differently depending on the area of application. Choose the ideal surface for you from the various options. The TopModul is available in ABS, stainless steel or full synthetic resin sheets.

TopModul made of ABS plastic with recess

TopModul made of ABS plastic without recess

TopModul in inox available with or without recess

## Sanitized® – protects surfaces against microbes

### Trolley frames and TopModules equipped with silver technology

All WIEGAND® trolley frames and ABS TopModules are equipped with Sanitized® silver technology. This technology provides durable protection against a wide range of bacteria and, in certain cases, against fungi.

The growth of bacteria and microbes is persistently inhibited and your FlexLine trolley surface can be easily cleaned. For more information on the cleaning and care of your WIEGAND® FlexLine nursing trolley, please visit our website [www.wiegand.ch](http://www.wiegand.ch)

## Wheels for any requirement

Wiegand offers you various wheels with a 100 mm diameter and red total stopper are fitted as standard. Depending on the size of the trolley or individual requirements, we also offer swivel castors with 75 and 125 mm diameters, swivel castors with directional locks or electrically conductive swivel castors.

Wheel with red bark

Wheel with grey direction bark

Electrically conductive wheel marked with yellow dot

# Locking systems for compliance with security standards

To safeguard your materials we offer various locking systems. Locking systems are usually chosen on the basis of a company-wide locking plan. We will be happy to help you choose a suitable system.

**Description** **Preparation for digital half cylinder Euro profile, 30 mm**

- Central locking for trolley
- Preparation for on-site cylinder mounting in drawer side panel or door

**Alternative** Salto XS4 Locker

**Description** **KitLock**

- Electronic combination lock

**Art. no.** KL1000 KitLock

**Description** **KABA 8 lock cylinder**

- Lock cylinder with bolt
- Bolt for front panel, door or side panel

**Art. no.** 1061.08 Lock cylinder KABA 8

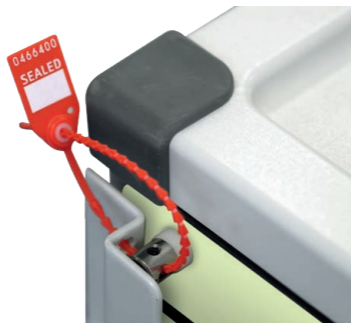

**Alternative** 1031.20 (The precondition is a locking plan)

**Description** **Equipment for seal lock**

- Preparation for drawer trolley
- Rail with preparation for seal
- Seal not included

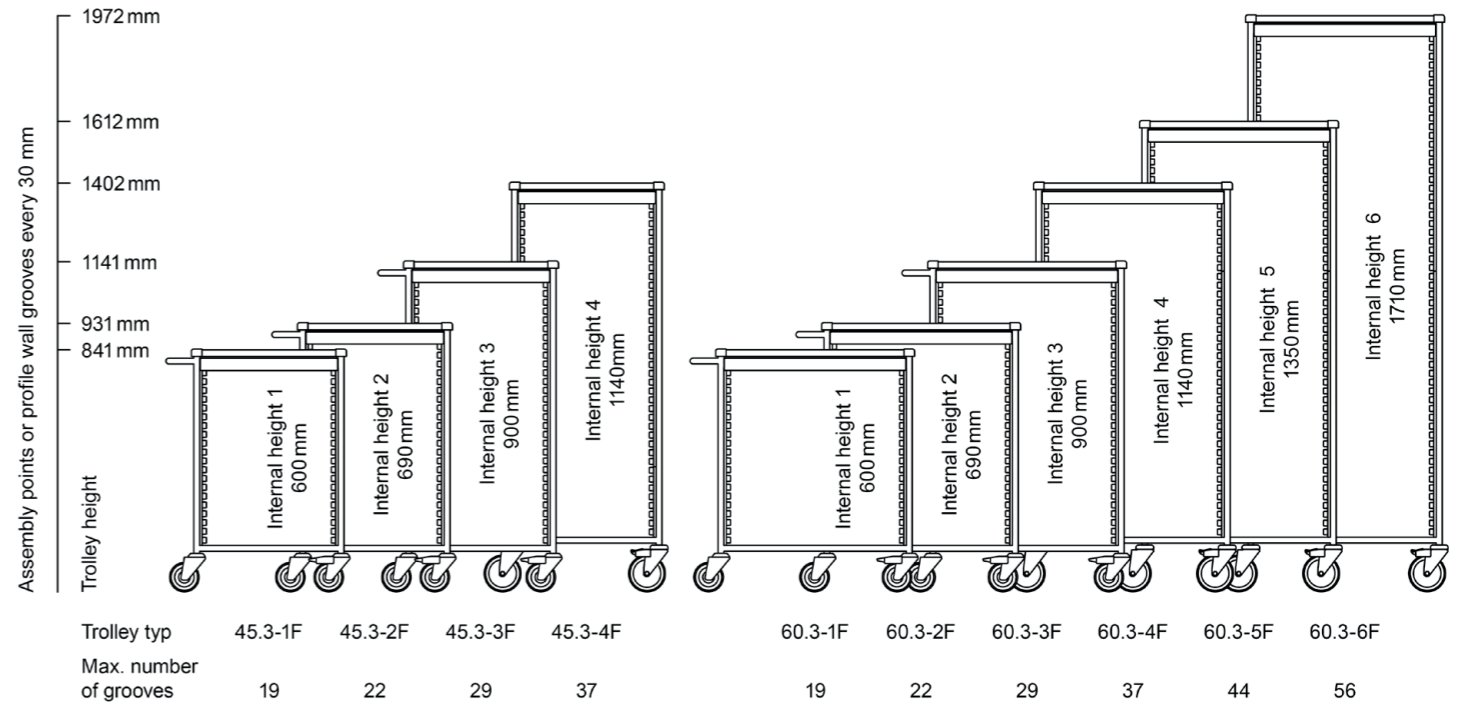

**Art. no.** 64.696-XF Device for seal lock based on trolley height

# WIEGAND® FlexLine standard sizes

Various trolley sizes available from stock

The design of the WIEGAND® FlexLine nursing trolley is based on a light and robust construction of welded, powder-coated steel tubing. WIEGAND® FlexLine nursing trolleys are available as standard in six different heights. Our standard trolleys are suitable for drawers and modules with widths of 450 or 600 mm..

# FlexLine Trolley colours

Choose from ten attractive colours

The colours of the trolleys shown may slightly be different.

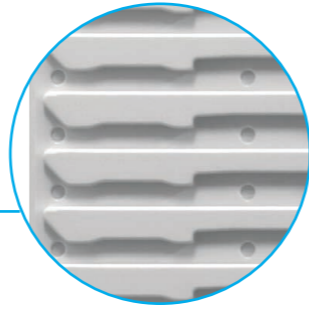

# Weekly system trolley

## For the storage and distribution of weekly systems

The medication distribution system by Wiegand can be integrated into the weekly system trolley in a space-saving and efficient way. The weekly system trolleys are tailored to the medication distribution system used and the number of residents or patients. The trolleys can be individually equipped with accessories so that the nursing staff can carry all the necessary medical aids.

B20.01005  
60.3A-3F

Shelving profile, grooves every 30mm

### Weekly system trolley

- With shelving profile for optimum use of space
- Offers space for weekly trays, FlexModul and more
- Laterally extendable work surface
- With swivelling waste bag holder
- Can be individually equipped with accessories, e.g. FlexModul trays or a basket made of Rilsan steel

B20.01001  
60.3A-3F

TRESTON Container for the storage of medicines

### Weekly system trolley with TRESTON

- TRESTON containers for the storage of medicines, available in various sizes
- WIEGAND® weekly tray can be used individually
- Combination of shelving profile and full-extension frame
- Laterally extendable work surface
- Accessories can be individually configured

Material accessible from both sides

### Weekly system trolley with two double doors

- Thanks to two double door you have access to the material from the back and front
- Equipped with shelving profile and full-extension frame
- Laterally extendable work surface
- Accessories can be individually configured

B20.01006  
64.3A-3F

Can be equipped with narcotics drawer

### Weekly system trolley

- Equipped with separately lockable narcotics drawer behind the door
- Ideal for storing WIEGAND® weekly systems
- Individual use of space
- Laterally extendable work surface
- Accessories can be individually configured

B20.01002  
60.3A-3F

# Medication trolley

## Your practical companion when dispensing medication

In order to reduce walking distances for nursing staff, medication trolleys are used during the dispensing process. The medication trolleys provide enough space to safely store the directed medicines and to transport additional, reserve or emergency medication and material. Thanks to the FlexLine trolley system, the medication trolleys can be individually equipped with accessories.

B20.01007  
45.3A-3F

Combination of door and drawer

### Medication trolley

- Additional drawer behind the lockable door
- With shelving profile for individual use of space
- Laterally extendable work surface
- With shelf board for storing various materials
- Can be individually equipped with accessories, e.g. waste bag holder and holder for hazardous waste containers

Tablet holder

### Medication trolley

- Flexibly adjustable holder for tablets
- With shelving profile for individual use of space
- Laterally extendable work surface
- With tray for storing various materials
- Can be individually equipped with accessories, e.g. waste bag holder

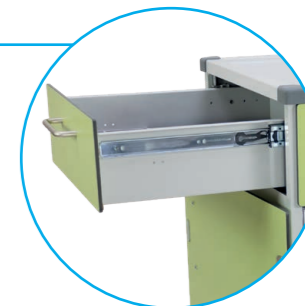

B20.01004  
45.3A-2F

WIEGAND FlexLine Trolley System

B20.01003  
45.3A-3F

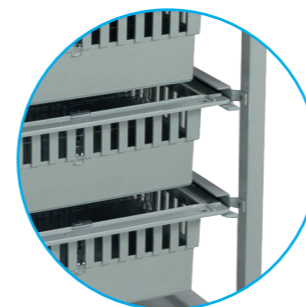

Lateral drawer

### Medication trolley with TRESTON

- Side-mounted drawer for material
- Combination of TRESTON containers and FlexModul for optimal space use
- Laterally extendable work surface
- Can be individually equipped with accessories, e.g. stainless steel waste bag holder and holder for risk waste container

## Multifunctional care trolleys

Practical rails for trays and baskets

### Open care trolley

- With five pairs of rails for carrying trays, FlexModul tray or baskets
- Laterally extendable work surface
- With electrically conductive wheels

B20.04005  
31.3A-1F

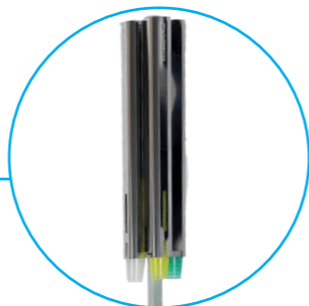

# Blister trolley

## Optimum storage and distribution of medication in blister packs

Externally prepared, blister-packed medication greatly reduces the workload for nursing staff during the medication process. Wiegand blister trolleys are tailor-made for the process of dispensing medication packaged in blister rolls. They hold blister rolls and additional medications, such as ointments, drops and related medical materials.

B20.02005  
60.3A-3F

Dispenser for MediCups

### Blister trolley for 30 residents

- 60 cm wide blister trolley with shelving profile
- Space for up to five FlexModul tray
- Tray for additional storage space
- Laterally extendable work surface
- Accessories can be individually configured

RILSAN basket

### Blister trolley for 30 residents

- 60 cm wide blister trolley with full-extension frame
- Tray for additional storage space
- Space for up to five FlexModul tray
- Laterally extendable work surface
- Accessories can be individually configured

WIEGAND FlexLine Trolley System

B20.02002  
45.3A-3F

Holder for risk waste container on steering handle

### Blister trolley for 20 residents

- 45 cm wide blister trolley with shelving profile
- Space for up to five FlexModul tray
- Tray for additional storage space
- Laterally extendable work surface
- Accessories can be individually configured

Flexible tray

### Blister trolley for 24 residents

- 45 cm wide blister trolley with full-extension frame
- Space for up to six FlexModul trays with a total of 24 BlisterBoxes or five FlexModul trays for 20 BlisterBoxes
- Laterally extendable work surface
- Accessories can be individually configured

B20.02001  
45.3A-3F

# FlexLine drawer trolley

## Versatile FlexLine nursing trolley

The FlexLine trolley system enables you to design the most diverse trolley configurations. Drawers can be used at variable heights to adapt the space available to the material. The drawer trolleys, be it for use in a hospital, clinic or nursing home, are a durable investment.

B20.04002  
45.3-3F

Height-adjustable lift table

### Nursing-Docu-Trolley

- Height-adjustable lift table, also available as a rotating lift table
- With different drawer heights
- Drawer with suspension file register
- Accessories can be individually configured

B20.05001  
60.3A-2F

Dispenser for disinfectants

### Dressing trolley

- 60 cm wide dressing trolley
- Different drawer heights combined
- Practical accessories such as dispenser for disinfectants, risk waste container, waste bag holder and holder for glove dispenser
- Laterally extendable work surface
- With labels for labelling drawers
- Accessories can be individually configured

IV pole

### Nursing trolley

- Versatile nursing trolley
- 4 full-extension frames with FlexModul tray
- Equipped with infusion pole, Rilsan basket, risk waste container and waste bag holder
- Laterally extendable work surface
- Accessories can be individually configured

STALA stocking system

### Double treatment trolley

- Comes two 45cm trolley frames
- Equipped with shelving profile and FlexModul tray
- Practical structure with STALA container as well as glove dispenser holder and dispenser for disinfectant
- Accessories can be individually configured

Lockable shutter

### Treatment trolley with shutter

- FlexModul tray for flexible use
- With lockable shutter light and electrically conductive wheels
- Laterally extendable work surface
- Accessories can be individually configured

B20.06004  
60.3A-2F

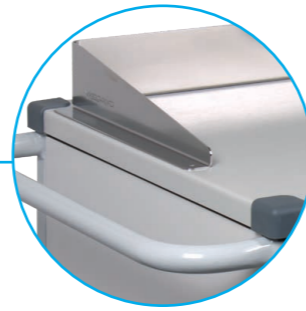

# Emergency trolley

## Store material and medical aids neatly

The requirements for an emergency trolley are very specific. Thanks to the FlexLine trolley system, we are able to produce specialised emergency trolleys. As FlexLine nursing trolleys are manufactured in Switzerland, every trolley can be configured according to your needs starting from just one unit.

B20.07001  
60.3A-2F

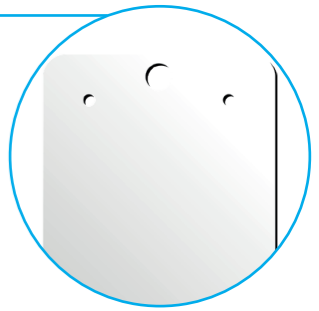

Inox gallery

### Emergency trolley with gallery

- With Inox TopModule and gallery
- Risk waste container and waste bag holder
- Equipped with infusion pole with three swivelling hooks
- Laterally extendable work surface
- With labels for drawer labelling
- Accessories can be individually configured

B20.07002  
34.3A-2F

Cardiac massage board

### Emergency trolley with cardiac massage board

- With Inox TopModule
- Cardiac massage board, dimensions: 80x50cm
- Holder for O2 bottle
- With universal equipment rail and holder for catheter
- Laterally extendable work surface
- With labels for drawer labelling
- Accessories can be individually configured

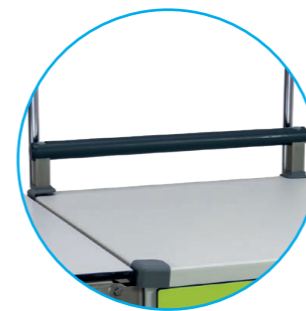

Labels for drawer labelling

### Emergency trolley

- Equipped with IV pole with three fixed hooks
- Triple glove box holder
- Risk waste container and waste bag holder
- With labels for drawer labelling
- Laterally extendable work surface
- Device for seal lock
- Accessories can be individually configured

B20.07003  
60.3A-2F

Attachable steering handle

### Multifunctional trolley

- The steering handle can be used flexibl
- Equipped with infusion pole with three fixed hooks
- Laterally extendable work surface
- Additional laterally foldable work surface
- Accessories can be individually configured

# Anaesthesia, operating theatre and intensive care trolleys

We develop practical solutions in cooperation with you

Thanks to our own development department, we are able to manufacture highly specialised trolleys for every department. We provide you with competent advice and work together to develop a solution tailored to your needs.

B20.08001  
60.3-2F

Holder for disinfectant wipes

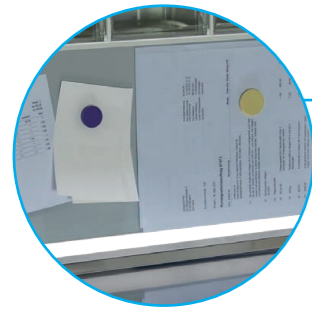

## Anaesthesia trolley

- With STALA structure and label dispenser
- Trolley body with drawers with different drawer fronts
- Risk waste container, form container as well as Inox waste bag holder, triple glove box holder
- Accessories can be individually configured

B20.08003  
60.3A-2F

WIEGAND FlexLine Trolley System

Magnetic board

## Anaesthesia trolley

- STALA storage system and with two glove box holders
- With magnetic board for documents or label boxes
- With device for seal lock
- Laterally extendable work surface
- Can be individually equipped with accessories, e.g. risk waste container, disinfectant dispenser, etc.

B20.09001  
4560.3A-2F

Form container

## Suture trolley

- Trolley combination of 45cm and 60cm drawers, coloured drawer fronts for quick identification
- Structure for suture material containers (can be obtained from suture material suppliers)
- Can be individually equipped with accessories, e.g. glove box holder and disinfectant dispenser
- With electrically conductive castors and Inox TopModule
- Accessories can be individually configured

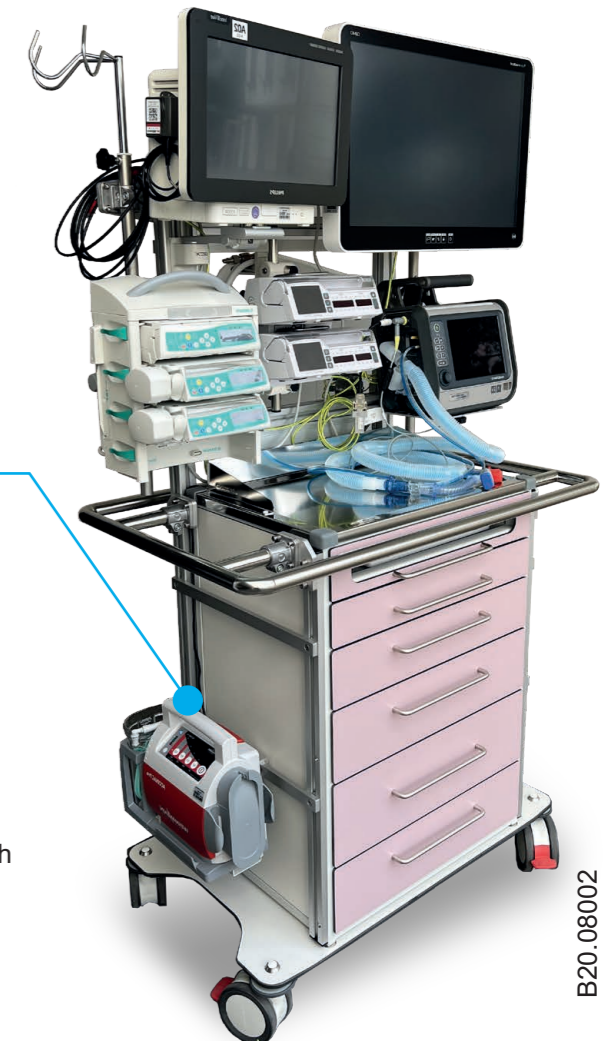

Device standard rail for fastening various devices

## Special anaesthesia trolley for the Cantonal Hospital in Lucerne

The specific requirements for a trolley in the anaesthesia department could be implemented thanks to the FlexLine trolley system. A highly specialised trolley is now in use at the Lucerne Cantonal Hospital, which finally makes a wide range of equipment mobile.

You can find out more about this project on our website.

B20.08002

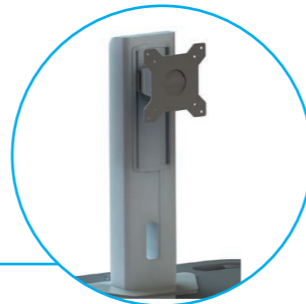

# Ward round and computer trolleys

## To support digital processes

We offer you various models of trolleys that have been specifically developed for digital process support. Choose the trolley that matches your needs and make use of the whole range of flexibility that the Wiegand system has to offer. For this trolley the FlexLine accessories are available for you to choose from, so that you can configure your trolley individually.

B20.03010  
45.3A-1F

Universal VESA monitor holder

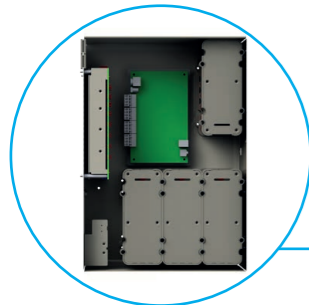

### MAX Nursing trolley

- Generous storage space for carrying medicines and materials
- Individual configuration - thanks to FlexLine system
- Can be equipped with locking systems
- Narcotics drawer possible
- Continuous height adjustment of the monitor
- With keyboard drawer and mouse tray
- Safe and tidy cable management possible
- Accessories can be individually configured

B20.03011  
45.3A-1F

WIEGAND FlexLine Trolley System

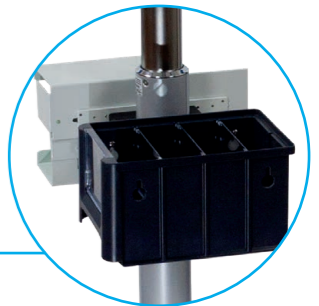

Energybox is attached under the trolley to save space

### WIEGAND® FlexLine Energybox

Every WIEGAND® FlexLine trolley can be equipped with the power system, a keyboard tray and a monitor with a thin client or an all-in-one PC. The WIEGAND® power system is designed as a universal power supply for nursing and ward trolleys. The power box is the core element in the power supply. It is mounted beneath the FlexLine trolley and does not take up any useful space.

B20.03001  
301.000.200

Accessory is mounted on lifting column

### LIGHT Ward round trolley

- Sturdy trolley body - ideal for fast walking and turning
- Large handles for easy trolley guidance
- Stepless height adjustment of the work surface
- Safe and tidy cable routing possible
- Two accessory parts can be combined individually

Find out more in our brochure „Computer, ward round and care trolleys“ at [www.wiegand.ch/downloads](http://www.wiegand.ch/downloads)

LED energy indicator

### Can be used as a mobile computer workstation

Equip the LIGHT ward round trolley as a mobile computer workstation. In addition to monitor holder, keyboard and mouse tray, the trolley can be equipped with a mobile energy box LIGHT. You can find out more about the different solutions on our website or ask our team.

- With handle profile on both sides and edge protection
- Space for approx. 15 to 20 suspension files
- Available in various colours
- Dimensions: 360x160x 272mm
- Material: polystyrene

**Art. no.** 10900.xxW Variobox for A4 suspension files  
10900.99W Edge protection

**Description** **Waste bag holder**

- Holder available in various sizes
- Made of high quality Rilsan
- Also available swivelling with spring catches

**Art. no.** 64.608 Waste bag holder, 3l, 24x13x24cm  
 64.609F Waste bag holder swivelling 5l, 32x19x32cm  
 64.610 Waste bag holder 5l, 28x18x32cm

**Description** **Inox waste bag holder**

- Made of hygienic Inox
- Capacity up to 11l
- Dimensions: 24x17x33cm

**Art. no.** 64.752 Inox waste bag holder  
 64.752S Inox waste bag holder, swivelling

**Description** **Wall-mounted waste bin MAXIWALLY**

- Practical knee opening
- Capacity 8l or 20l
- Removable inner bin
- Material ABS grey, inner bin PP

**Art. no.** 64.763-8 Wall-mounted waste bin MAXIWALLY 8l  
 64.763-20 Wall-mounted waste bin MAXIWALLY 20l

**Description** **Holder for O2 bottle**

- Suitable for bottles with 3.8 or 5 litre capacity
- Holder consisting of base plate and two tensioning straps
- Tensioning straps individually adjustable

**Art. no.** 64.733 Holder for O2 bottle 3.8l  
 64.734 Holder for O2 bottle, 5l

**Description** **Holder for bottle, small**

- Suitable for bottles with a max. diameter of 78mm
- Height 124mm
- Made of inox

**Art. no.** 64.739 Holder for bottle, small

**Description** **Lateral work surface, foldable tray**

- For extending the work surface

**Art. no.** TKS-25.1 Lateral tray, foldable, surface up to 0.25 m2  
 TKS-50.1 Lateral tray, foldable, surface up to 0.5 m2

**Description** **Tablet holder**

- Suitable for tablets / iPads 7-13 inch
- Tablet can be used horizontally or vertically
- Tilts up to 15°
- Max. Weight 2kg

**Art. no.** TMS1030 Tablet holder  
 64.697 Basis holder

**Description** **Laptop holder**

- Swivelling, rotating and tilting shelf for laptops
- Suitable for laptop up to 17.3"
- Support surface for laptop: 385x275 mm

**Art. no.** 64.773-3 Laptop holder

**Description** **Monitor holder VESA**

- Rotatability of the monitor 360°
- Monitor swivel -5°(bottom) ~ +25°(top)
- Height adjustment 130mm, for monitor up to 24 inch
- With cable management
- Dimensions: 100x100x75 mm

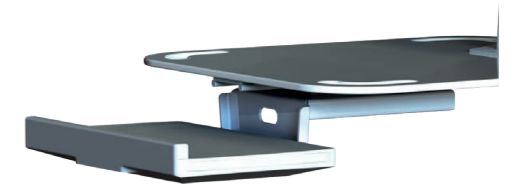

**Art. no.** 64.777-G08 Standard monitor holder VESA, 8kg load capacity  
 64.777-G12 Straight monitor holder VESA, 12kg load capacity

**Description** **Keyboard holder**

- Reinforced keyboard holder
- With extendable mouse tray

**Art. no.** 64.778-3 Keyboard holder for ward round trolley LIGHT  
 64.778-2 Keyboard holder for MAX nursing trolley

**Description** **Laptop drawer**

- Space-saving and secure laptop drawer
- Also available lockable
- Further variants available

**Art. no.** 3346.1-12F Laptop drawer  
 3440.1-12F Laptop drawer  
 4046.1-12F Laptop drawer

**Description** **Lifting table rotatable**

- Rotatable work surface
- Lockable every 90°

**Art. no.** HT45D.400.520.350 Rotating lift table  
 64.794 Extendable mouse tray

**Description** **STALA and PicBox storage system**

- Containers available in various sizes
- Containers can be freely combined
- For dust-proof storage of material"

**Art. no.** 60STALA-xx System for trolley 60.x  
45STALA-xx System for trolley 45.x

**Container:** STALA3 / STALA4 / STALA5 / STALA6  
PicBox3 / PicBox5

**Description** **Holder for catheter**

- With pull-out rail
- Available with hooks on both sides or one side
- Various versions available

**Art. no.** 02437-01 Holder for catheter with 2x5 hooks  
02437-02 Holder for catheter with 1x5 hooks  
01238-01 Holder for catheter with 2x6 hooks  
01238-02 Holder for catheter with 1x6 hooks

**Description** **Equipment rail, universal**

- Practical aluminium equipment rail
- For attaching various tools
- Can be used individually
- Available in various length

**Description** **Connector for equipotential bonding**

- There must be one potential-free contact per attached unit.
- Mounting is at the rear/top of the frame

**Art. no.** 64.712 Connector for equipotential bonding

**Description** **Connection plug board**

- Holder to install a connection plug
- Cable length: 2 m
- Sale only in CH, other countries on request

**Art. no.** 900.050.001 Connection plug board

**Description** **Board for cardiac massage**

- Cardiac massage board made of robust VKH
- Dimensions 80x50cm
- Attachment to the trolley

**Art. no.** 64.683 Board for cardiac massage

## Furnishing solutions for drawers

You can equip the drawers of the FlexLine trolleys with various sets of small containers, TRESTON containers or dividers as required. Individual solutions are also possible – our team will help you with the configuration of drawers. .

### Containers

You will find various small containers in our range for the individual division of the drawers. These are available individually or in various sets.

### TRESTON Containers

The storage containers are ideal for storing medicines, ointments, drops, etc. for each resident. Thanks to the ribbed bottom, picking up even the smallest objects is made easier. The TRESTON containers can be flexibly divided and are stackable.

### Sliding dividers

Sliding dividers serve as flexible partitioning aids for sets of drawers or the FlexModul. At the predetermined breaking point, the sliding divider can be shortened to any centimetre of the sheet width. It is infinitely adjustable and thus offers endless possibilities for the individual subdivision of your drawers..

### Anti-slip mats for drawers

**Description**

**Anti-slip mats**

- Prevents containers from slipping away
- Available in different sizes

**Artikel-Nr.** 34S.AS Anti-slip mats 300x390mm  
45S.AS Anti-slip mats 410x390mm  
60S.AS Anti-slip mats 560x390mm

## Organisation solutions for 45mm drawers

The internal dimensions of the drawer are 413 x 402 mm (width x depth).

### Description Container set S1

Set consisting of:

Art. 2269	5 Containers A (80x80x45mm)

# Ideal use of space for storage

## FlexLine nursing trolleys combined with FlexModul trays

The extensive range of FlexModul trays enables a wide variety of materials to be stored in a space-saving manner. The trays offer countless application possibilities and can be used individually in the trolley. The trays can be individually divided with the help of sliding dividers so that your material fits neatly in the tray and does not slip. The FlexLine trolley can be equipped for the use of FlexModul trays with shelving profile, pull-out frames or drawers.

FlexModul in shelving profile

FlexModul in full-extension frame

FlexModul in pull-out frame with front panel
