

Computer, ward round and nursing trolleys

Wiegand trolleys for digital process
support in hospitals, clinics
and nursing homes

WIEGAND®

Digital process support

Innovative computer trolleys that can be individually customised for your processes.

For 50 years, Wiegand has been developing and creating solutions to support medication and logistics processes in the health sector. In collaboration with doctors and nursing professionals, Wiegand is constantly developing new, modern solutions for process optimisation in hospitals and nursing homes.

Our new trolley range enables doctors and specialist staff to implement digital processes. For example, on ward rounds, patient documentation can be input

directly into the computer and necessary equipment can be carried on the trolley. The trolleys also provide an ergonomic workplace solution as a mobile workstation for nursing professionals. Thanks to their many possible configurations, these easily manoeuvrable trolleys have a vast range of applications. Choose the ideal trolley for your processes, or contact us to configure a personalised solution.

Swiss Made

Every WIEGAND® trolley is manufactured in the company's workshop in Bülach near Zurich to meet your specific requirements. Employees in quality control conduct rigorous tests to check the materials and workmanship of each trolley. We produce our trolleys substantially and at the best possible prices.

WIEGAND® trolleys are entirely maintenance-free, so that you will not incur hidden costs in the future. We also offer a 5-year warranty on design and manufacturing errors.

Computer, ward round and nursing trolleys

Wiegand offers you various models of trolley that have been specifically developed for digital process support. Choose the trolley that matches your needs and make use of the whole range of flexibility that the

Trolleys custom-tailored to your processes

Wiegand system has to offer. For every trolley there's a wide range of accessories available for you to choose from, so that you can configure your trolley individually.

COMPACT laptop trolley

Easy to manoeuvre and ideal for narrow corridors, the COMPACT laptop trolley is the smallest and lightest computer trolley made by Wiegand. It has ample space for a laptop and is equipped with a fold-out document worktop.

LIGHT ward round trolley

Your ideal companion on ward rounds in hospitals and clinics. The LIGHT ward round trolley will impress you with its stable construction, and it can be manoeuvred through corridors and narrow patient rooms with effortless ease.

MAX nursing trolley

The whole range of flexibility of the Wiegand FlexLine system is available to you for configuring your MAX nursing trolley. This multi-functional nursing trolley can be optimally customised to your work processes and offers particular advantages for patient care and documentation. With plenty of storage space for medicines and equipment, the MAX nursing trolley is ideally suited for use as a mobile workstation.

ISO nursing trolley

This combination of a large nursing trolley and an all-in-one computer is ideal for use in treatment rooms or wards. Designed using the FlexLine system, the ISO nursing trolley is extremely flexible and can be tailored to meet the individual needs of nursing staff. The trolley also has ample space for storing dressings and other consumables.

COMPACT laptop trolley

The COMPACT laptop trolley is the smallest and lightest computer trolley made by Wiegand. The nimble COMPACT laptop trolley comes with a generous worktop and can navigate narrow corridors and

patient rooms with ease. The worktop has enough space for a laptop and room for documents on an additional fold-out surface.

All the benefits at a glance:

- Space-saving, manoeuvrable laptop trolley
- Continuous height adjustment of the work surface
- Additional side folding table for extending the work surface
- Tray compartment as storage for small items
- Possible to work comfortably sitting or standing
- Robust steel base

Technical specifications:

Dimensions work surface: 470 x 470 mm
Dimensions stand: 495 x 500 mm
Height work surface: 790 up to 1190 mm - continuously adjustable
Dimensions side folding table: 280 x 340mm

LIGHT ward round trolley

The LIGHT ward round trolley is your reliable companion on ward rounds. You can move effortlessly through narrow corridors and patient rooms with this agile ward round trolley. The generous worktop provides you with enough space for a diversity of

documents or a laptop. If required, you can add an All-in-One PC, a keyboard extension and useful accessories to your ward trolley, which can be mounted directly on the height-adjustable lifting column.

All the benefits at a glance:

- Stable trolley construction – ideally suited for brisk walking and turning
- Good floor grip, easily manoeuvrable
- Large work surface with antibacterial coating
- Large hand grips all round to simplify trolley steering
- Continuous height adjustment enables ergonomic working
- Can be equipped with universal VESA monitor bracket
- Safe, tidy cabling
- Signal-red wheel brakes for greater safety
- Accessories can be individually combined
- Space-saving keyboard holder
- Mouse tray – suitable for left- or right-handed users
- Possible to work comfortably sitting or standing
- Designer pedestal for more legroom

Technical specifications:

Dimensions work surface:	590 x 590 mm
Dimensions stand:	600 x 600 mm
Height work surface:	720 up to 1120 mm - continuously adjustable
Wiegand No:	301.000.200

WIEGAND® LIGHT power box

The LIGHT energy box is mounted vertically on the height-adjustable column and can be fitted with up to three 240 Wh battery modules. Washable and disinfectable, the cable routing connects the electronics on the height-adjustable table with the LIGHT power box. This means that all cables can be housed in a safe and neat environment.

The control box is mounted directly on the LIGHT power box. It holds the charging plug for 230V AC as well as the on-off switch to disconnect the batteries from the devices and therefore extend their life. The cable box with the visible LCD display is located behind the monitor. A VESA-100 bracket is used to mount a simple monitor or a 230V all-in-one PC. A thin client is also required for monitor-only configurations, which is placed on top of the cable box.

Accessories for LIGHT ward round trolley

By means of an adaptor, two freely chosen accessories can be mounted on the LIGHT ward round trolley. Depending on your working method, you can decide whether you would prefer the accessories to be

mounted on the front or the side. You can also retrofit the accessories later or, if your needs change, replace them with just a few twists of the hand.

Universal container

- Incl. insertion window
- Dimensions: 230x150x125 mm
- Material: plastic

Art. No. 301.001.200.S (F) Universal container

MAX nursing trolley

This nursing trolley offers you the unique combination of nursing trolley with plenty of storage space for medicines, dressings and consumables together with a mobile computer workstation. Thanks to the time-tested FlexLine system, you can configure the MAX nursing trolley exactly according to your needs.

With this nursing trolley you don't have to make any compromises: you get a long-lasting, robust trolley that can be adapted if your requirements change.

All the benefits at a glance:

- Generous storage space for carrying medicines and materials
- Individually configurable thanks to Wiegand FlexLine system
- Can be equipped with various locking systems
- Compact and easily manoeuvrable – also ideal for narrow spaces
- Large hand grips all round to simplify trolley steering
- Continuous height adjustment – suits every body size
- Available with universal VESA monitor holder
- Pull-out keyboard and mouse tray (for left- or right-handed users)
- Can be individually equipped with side-mounted pull-out worktop
- Possible to integrate an anaesthetics drawer
- Can be equipped with doors or drawers
- Available with shelving profiles or pull-out frames
- Door and drawer coverings available in various colours

Technical specifications:

Dimensions work surface: 600 x 590 mm
Height work surface: 755 up to 1155 mm - continuously adjustable

WIEGAND® FlexLine power box

Every WIEGAND® FlexLine trolley can be equipped with the power system, a keyboard tray and a monitor with a thin client or an all-in-one PC. The WIEGAND® power system is designed as a universal power supply for nursing and ward trolleys. The power box is the core element in the power supply. It is mounted beneath the FlexLine trolley and does not take

up any useful space. It holds between one and four battery modules with a capacity of 240 Wh each. The large battery cells and the smart control software significantly extend the life expectancy of the battery modules. In addition, the large battery cells increase charging speed and output power.

ISO nursing trolley

This combination of a large nursing trolley and all-in-one computer is ideal for use in treatment rooms or wards. Designed using the FlexLine system, the ISO nursing trolley is very versatile and can be adapted

to suit the needs of nursing staff. Despite its size, the ISO nursing trolley is extremely flexible and easy to manoeuvre.

All the benefits at a glance:

- Secure, compact drawer with space for a mouse and keyboard
- WIEGAND® FlexLine system for custom configuration
- Compatible with a range of locking systems
- Ample storage space for consumables and more
- Silicone protective edge around the top module
- Optional pull-out worktop at the side
- Equipped with doors or drawers
- Available with profile walls or extendable frames
- Door and drawer covers available in a variety of colours
- Custom drawer configuration possible

Technical specifications:

Dimensions work surface: 675 x 475 mm
Height work surface: 1141 mm

WIEGAND® FlexLine power box

The ISO nursing trolley can also be equipped with a power system. This WIEGAND® system is designed as a universal power supply for nursing and ward trol-

leys. If the WIEGAND® power system is used in ISO nursing trolleys, all cables are arranged neatly inside the trolley.

Invisible cable routing

FlexLine power box with up to three battery modules

Power cable to charge the FlexLine power box

WIEGAND® FlexLine system

With the FlexLine system, Wiegand offers considerable design freedom to match the MAX and ISO nursing trolley precisely to your needs. The FlexLine

trolley system enables individual configurations and comes with a wide range of accessories to deliver optimum support for your workflows.

Select the basic configuration for your custom MAX nursing trolley or ISO nursing trolley here:

- Shelving profiles or full pull-out frames
- Drawers and anaesthetic drawers
- Side-mounted pull-out work surface
- Various locking systems available
- Various accessories such as holders and dispensers
- Swivel castors for any requirement

Pull-out frame for fixed attachment of modules to the trolley

Shelving profiles enable more flexible deployment of the trolley

Trolley colours

Wiegand offers you a diverse selection of trolley colours, whether you're working with uniform colour codes or want to stick to a specific décor concept. The front sides of the drawers and doors are available in the following 10 standard colours at no extra cost:

0717 Atlantic

0718 Arctis

0024 Vivo

Alternatives	64.681PK-3x1	3 x 1 hooks swivelling
	64.681PK-5x1	5 x 1 hooks swivelling

Individual features for nursing trolleys

Wiegand developed the rotating, height-adjustable table to convert nursing trolleys into mobile workstations. The nursing trolley can then be equipped with additional work surfaces, e.g. for laptops. The height-adjustable table can be rotated by 360°. It can be locked in place every 90° to offer four working po-

sitions. It is infinitely height-adjustable and enables ergonomic work in a seated and standing position. The rotating, height-adjustable table can also be used to modify existing nursing trolleys – subject to certain technical conditions*.

All the benefits at a glance:

- 360° rotating, height-adjustable table
- Continuous height adjustment
- Manufactured from premium HPL
- Additional work surface
- Ergonomic work in a seated and standing position
- Can be retrofitted to existing nursing trolleys*

Ideal use of space

The rotating, height-adjustable table can be equipped with a separate mouse tray. The mouse tray is suitable for right and left-handed persons. To save space, the tray can be slid back beneath the tabletop when not in use.

*The nursing trolleys must satisfy certain technical requirements. We would gladly discuss with you whether your nursing trolleys are suitable for retrofitting with a rotating, height-adjustable table.
