

# WiBox pro – medication, safe, mobile

**The weekly set for home and on the go.  
Keep an overview of your medication supply  
for the whole week using the WiBox pro.**

We have developed a new weekly system in cooperation with the Spitex Association and three Spitex organisations that responds especially to the requirements of taking medication at home. The WiBox pro weekly set provides a quick and easy means of use with a good level of safety. Stay mobile - using this weekly system you are well supported during a day's excursion or when travelling. Due to its high quality material and careful construction you will be happy with the WiBox pro for a long time.

**Easy, practical and quick**

Open the case, slide open the lid, prepare the medication, control and slide the lid shut – finished. Regardless of who does the preparation – the patient, outpatient care, chemist or carer – it is quick and easy.

**Overview and Safety**

The good overview eases the checking of the prepared medications. Each of the seven day dispensers is labelled with a weekday. The dispenser can only be opened in one direction and therefore medication is automatically given in the correct order.

**Lock – Secure – Transport**

The handy WiBox pro can be locked with a commonly available lock. When you want to take along a single dispenser, you secure the lid with the green locking pin. The lid is securely closed such that when the dispenser or the WiBox pro would fall on the floor the tablets stay in their compartment.

**The 8th Dispenser**

The 8th dispenser is individually useable. Use it on the day during which the remaining dispensers for the next 7 days are prepared or you can use it for reserve medications.

**Labelling**

Dispenser and case can be marked using waterproof markers or labels.

**Cleaning**

Dispenser, lid and case can be cleaned and dried in household dishwashers using a normal wash cycle up to a max of 60°.

## WiBox pro with accessories

### 1. WiBox pro Weekly Set

Case with 7 day dispensers (Monday - Sunday) and 1 dispenser without a weekday, 190x225x50 mm, Article No. 230.00.01.EN
